

# Zander Roi Tabelona

Highly motivated and results-oriented professional with a strong background in web development (Laravel, VueJS, NuxtJS), and UI/UX design. Proven track record of delivering successful projects, including developing database systems and dashboards (Looker Studio) for government agencies (i.e. Technical Education and Skills Development Authority) and building inventory and registrar management systems for educational institutions (Philippine Merchant Marine Academy) using the Laravel Framework. Skilled at creating intuitive user interfaces and user experiences, as demonstrated by my contributions to company websites using Figma, WordPress, and Elementor. Highly proficient in video editing and currently discovering the landscape of delivering engaging contents which includes but not limited to social media engagements.
